

GRADUATE OPPORTUNITIES

United Group Limited Rail Systems business is the leading provider of integrated systems for rail infrastructure within Australia and New Zealand specializing in the delivery of turnkey rail systems. It is a market leader in delivering technical expertise in signalling, communications, traction power, overhead electrification and specialist track infrastructure.

We are currently looking for high quality graduates with an Electrical Engineering discipline (Computer Science major preferred).

The Graduate Development Program is designed to focus on accelerating personal and professional development. Graduates become contributing members of project teams while building specialist skills.

The UGL Graduate Development Program offers each graduate the opportunity to build capability across different range of key business areas.

You will also gain experience and knowledge across support and service areas.

Each member of the program is mentored and has a tailored learning program that places emphasis on integrating graduates into real projects for structured learning experiences.

The practical skills and experiences you gain in Rail Systems will assist your professional accreditation.

To become an integral member of a dynamic and fast growing business, please send a copy of your CV to Grace Remonte on grace.remonte@unitedgrouppltd.com
