

## ABOUT QENOS

Qenos is the cornerstone of Australia's plastics industry. Our products are a part of every day life. By manufacturing the raw materials used in thousands of household, consumer and industrial products, Qenos provides the building blocks for the future.

At Qenos we use Australian oil and gas feedstocks from Bass Strait and the Moomba Basin. We employ 830 people. Our plants in Sydney and Melbourne produce olefins and a full range of polyethylene products (HDPE, LDPE and LLDPE). We also supply a diverse range of specialty polymers. That makes Qenos a vital link in the Australian manufacturing chain, supplying industries that employ hundreds of thousands of people.

## ENGINEERING EMPLOYMENT OPPORTUNITIES

Qenos seeks penultimate year students, who are willing to make the most of their abilities and careers. We value students who can demonstrate real initiative, analytical thinking and adaptability.

This summer, we are looking for students in the following disciplines to complete their industrial experience at our Botany site over 12 weeks.

- **Chemical Engineering**
- **Mechanical Engineering**
- **Electrical Engineering**

Apply online at [www.qenos.com](http://www.qenos.com) before **31 August 2009**.
